

Rushiprasad D. Daitkar

Java Full-Stack Developer

+91 7498863502 || daitkarrushi2004@gmail.com || [Github](#)

PROFILE SUMMARY

Java Full Stack Developer specializing in building scalable web applications using Java, Spring Boot, React, REST APIs, and database technologies. Experienced in developing end-to-end applications, designing backend services, managing databases, and creating responsive user interfaces. Strong foundation in Java, Spring Boot, Hibernate, MySQL, MongoDB, and modern frontend development, with a growing focus on DevOps, cloud technologies, and intelligent application development. Passionate about solving real-world problems through clean, efficient, and maintainable software solutions.

PROJECT

1) DurgSetu AI – Intelligent Heritage Monitoring System

Objective: Developed an intelligent heritage monitoring platform designed to support the preservation and preventive maintenance of historical forts through data-driven analysis and computer vision.

- Detects structural concerns such as cracks, surface erosion, vegetation growth, and visible deterioration from site imagery.
- Analyzes drone, satellite, and historical environmental data to assess potential risks and identify vulnerable areas.
- Provides timely alerts and interactive dashboards to help conservation authorities monitor site conditions and prioritize maintenance activities.
- Promotes proactive and sustainable heritage conservation practices aligned with UNESCO preservation principles and the United Nations Sustainable Development Goals (SDGs).

Tools & Technologies: Python, Django, React.js, TensorFlow, OpenCV, LSTM, Random Forest, XGBoost, PostgreSQL

Project: <https://durgsetuai.vercel.app>

2) VeriChain – Secure Credential Issuance & Verification System

Tech Stack: Java, Spring Boot, Spring Security, JWT, MySQL, Python, FastAPI, OpenCV, PyTesseract, React.js, Docker

- Developed a full-stack credential issuance and verification platform using Spring Boot, React.js, and FastAPI, enabling institutions to securely issue and validate digital certificates.
- Designed a tamper-evident ledger using SHA-256 hash chaining and RSA-2048 digital signatures, with JWT-based RBAC and AES-256-GCM encryption for enhanced security.
- Built an OCR and computer vision pipeline using OpenCV and PyTesseract to extract and verify credentials from images and PDFs through QR scanning with an OCR fallback mechanism.
- Automated PDF certificate and QR code generation while implementing database locking and transaction management to ensure reliable concurrent certificate issuance.

SKILLS

- **Programming & Development:** Java, Python, JavaScript, C++, SQL, Spring Boot, React.js, REST APIs, HTML, CSS, Git
- **Backend & Security:** Spring Security, JWT Authentication, Role-Based Access Control (RBAC), Hibernate, JPA, JDBC, Microservices, RESTful API Development
- **Data & Intelligent Systems:** LSTM, Random Forest, XGBoost, Computer Vision, OCR, Data Analysis
- **Databases:** MySQL, PostgreSQL, MongoDB, JPA/Hibernate ORM
- **Development & DevOps:** Git, GitHub, Maven, Vite, Linux, Application Deployment
- **Frontend Technologies:** React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design

- **Expertise Areas:** Java Full-Stack Development, Backend Development, REST API Development, Secure Application Development, Database Management, Computer Vision, and End-to-End Web Application Development

DurgSetu AI – Intelligent Heritage Monitoring System

(Copyright Certificate No. LD-20250179413 · Registered Dec 30, 2025)

Registered as a co-author and co-owner of the copyrighted work “**DurgSetu AI,**” a prototype system designed to detect structural risks in Maratha forts, provide sustainability-focused insights, and present SDG-mapped dashboards supporting UNESCO heritage conservation and student learning.

EDUCATION

Bachelor's degree in Computer Engineering
SNJB's College of Engineering, chandwad
CGPA: 7.59

Nashik, Maharashtra
2022-26 / 423101
